Kickstart your Full Stack development journey today!

WWW.NAVIGOACADEMY.COM

Full-Stack Development is one of the most powerful and complete skills in the IT and web industry. A Full-Stack Developer is someone who can handle both the front-end (what users see) and the back-end (how the website works behind the scenes).

At Navigo, we train students to become complete developers who can design, develop, and manage entire websites or web applications independently. This course is ideal for students who want to build a strong career in web development, freelancing, or software engineering.

What You Will Learn

This module covers everything — from website design to database management. Students will learn:

Front-End Development

- HTML, CSS, and JavaScript
- Responsive Web Design
- Bootstrap Framework
- Front-end libraries and frameworks (React.js or basic Vue.js)
- Creating user-friendly and mobile-optimized designs
- Connecting front-end with APIs

Back-End Development

- Introduction to server-side programming
- Node.js or PHP basics
- Working with databases (MySQL, MongoDB)
- Creating and managing APIs
- Handling data and user authentication
- Connecting website with database and hosting

Additional Skills

- Version control using Git & GitHub
- Deploying websites on live servers
- Debugging and testing
- Security and performance optimization

Each concept is taught through real-life projects, so students can practically build full working websites by themselves.

Tools Covered

These tools will help Students get hands-on experience with a variety of professional tools without needing advanced learn how to use professional Developer tools like:

- HTML, CSS, JavaScript

- React.js / Bootstrap

- Node.js / Express.js / PHP

- MySQL / MongoDB

- Git & GitHub

- Visual Studio Code

- cPanel / Hosting Tools

These technologies are used by professional developers and companies across the world to create dynamic, responsive, and secure websites.

Career Opportunities

After completing this module, students can start their career as:

- Full-Stack Developer

- Web Application Developer

- Front-End / Back-End Developer

- Software Developer

- Freelance Website Developer

- Startup Web Consultant

Full-Stack Developers are highly in demand because they can handle complete web projects from start to finish. This makes them one of the most valuable professionals in the IT and digital marketing industry.

Duration

(Duration: 3 Months)

12 weeks of hands-on practical training including full live project development and deployment

Key Highlights

- Learn complete web development in one course

- Work on live projects from scratch

- No prior coding experience required

- Free project files and lifetime access to notes

- Certification after course completion

Course Fee: ₹24,500 Only!
